

# Somo Automation Engineer Take Home Test

## Assignment

Create tests using your preferred Javascript based end to end testing framework on the linked sites that provide simple elements.

## Requirements

Utilizing the testing framework, select 2 of the 4 exercises below and build out automated tests and test cases around the elements:

- Form Authentication - <http://the-internet.herokuapp.com/login>
- iFrames - <http://the-internet.herokuapp.com/iframe>
- Add/Remove Elements - [http://the-internet.herokuapp.com/add\\_remove\\_elements/](http://the-internet.herokuapp.com/add_remove_elements/)
- Notification Messages - [http://the-internet.herokuapp.com/notification\\_message\\_rendered](http://the-internet.herokuapp.com/notification_message_rendered)

## Deliverables

Provide a zip file or github repo to submit the files and instructions to run the tests. This test should take no longer than 1-2 hours to complete.
